New 6-11mm and 12-14mm now available.

We've got all your holes covered!!!

Pest Controllers, if you do not have time to save \$\$\$, or be more efficient in your business then STOP reading now.

Millions of ConSeals already in use are you missing out???

- * Do you find it tiresome and time consuming sealing injection holes when completing Termite treatments ???
- * Then we would like to offer you a newly patented professional finish to the Termite treatment process cheaper and quicker than cork that reduces your treatment time.
- * ConSeals saves \$\$\$ by making the process simpler and easier !!!
- * ConSeals have been specifically developed for the Pest Control Industry to efficiently seal injection holes drilled in concrete.
- * ConSeals have been carefully engineered to last for many years in exposed areas.
- * ConSeals are easily applied to injection holes immediately after drilling.
- * ConSeals are designed to provide a water proof seal for holes drilled in concrete ranging in size from 6-11 and 12- 14 millimetres one seal does both sizes.
- * ConSeals are currently available in 7 colours GREY, BEIGE, BLACK, BROWN, GREEN, MAROON and TERRACOTTA thus providing a professional finish to the completed job.
